

10x10 JACKSON HOLE

CHOOSE TO REDUCE

More Baseline Data.
How to improve your
facility recycling.

In the Spotlight.....

The Jackson Police Department has been flying under the radar! The baseline data is finally complete and after reviewing Department stats it has come to our attention that the Police Department is saving fuel in a **BIG** way! One of their strategies was adding an additional battery to each of their vehicles, allowing them to shut off their engines rather than idle. By doing that they have saved a whopping 17% in fuel. Chief Zivkovich said that energy efficient driving education has helped too. Just goes to show that a few small changes **CAN** make a **BIG** difference. Way to go PD!!!

Baseline Data Is Here!! Baseline Data has been entered and is available for review. On any town or county computer go to: <http://10x10jh> We will have helpful hints on reading the data in future issues of **Waste Not Wednesdays** so stay tuned.....

Cleaned out any old files lately? What did you do with *ALL THAT PAPER?* In early January TOJ tasked Melanie Adams, Joleen Tafoya and Cynthia Riedel with cleaning out the basement storage room and purging old records. Some records had to be shredded but the remainder was set aside, boxed up and given out to other town depts. for reuse. This was no easy task!! The amount of paper salvaged for reuse when stacked up easily measured 6 feet tall. Thanks for all your efforts and taking your time to make a difference—**6 FEET WORTH!!**

Department Update

The rigorous recycling program that kicked off in the County Admin Building in early February was the brain child of the Zero Waste Committee. The committee was formed several months ago focusing on waste reduction and recycling in the admin building. Facilities Management heads it up with representatives from the Assessor, County Clerk, Treasurer and Planning Offices along with the expertise of JH Recycling, Curbside Recycling and White Glove Cleaning. The primary focus of the team is to reduce waste and improve recycling throughout the building. Who knows what they'll come up with next!

Did You Know... that the energy saved from recycling a single aluminum can will operate a television for three hours!!

WINNER! Congratulations to Ryan Shamburger, head Lifeguard at Parks and Rec for correctly matching Kwh's used with the facilities. There were many correct entries so thanks everyone for playing. The winning numbers are as follows: **1.** 5,841,481=Waste Water Treatment Plant, **2.** 1,246,240=Rec Center, **3.** 394,480=Town Hall, **4.** 10,514=Miller Park Restroom.

THE NEW CONTEST: We are looking good energy saving New Year's Resolutions (I know its practically March already but who says you can't make a resolution any time of year!). Let us know what you come up with. Make it something that we can all apply as we go through our work day and something that is reasonably attainable. We will place all of the qualifying entries in a hat for a drawing, winner will receive a stainless steel water bottle.

UPCOMING MEETING SCHEDULE

Zero Waste Committee - March 3, 3pm-Planning/Bldg Conference Room.

Communications Action Team - Last Tuesday of each month, 3pm-TOJ small Conference Room
