Subject: Bike Path

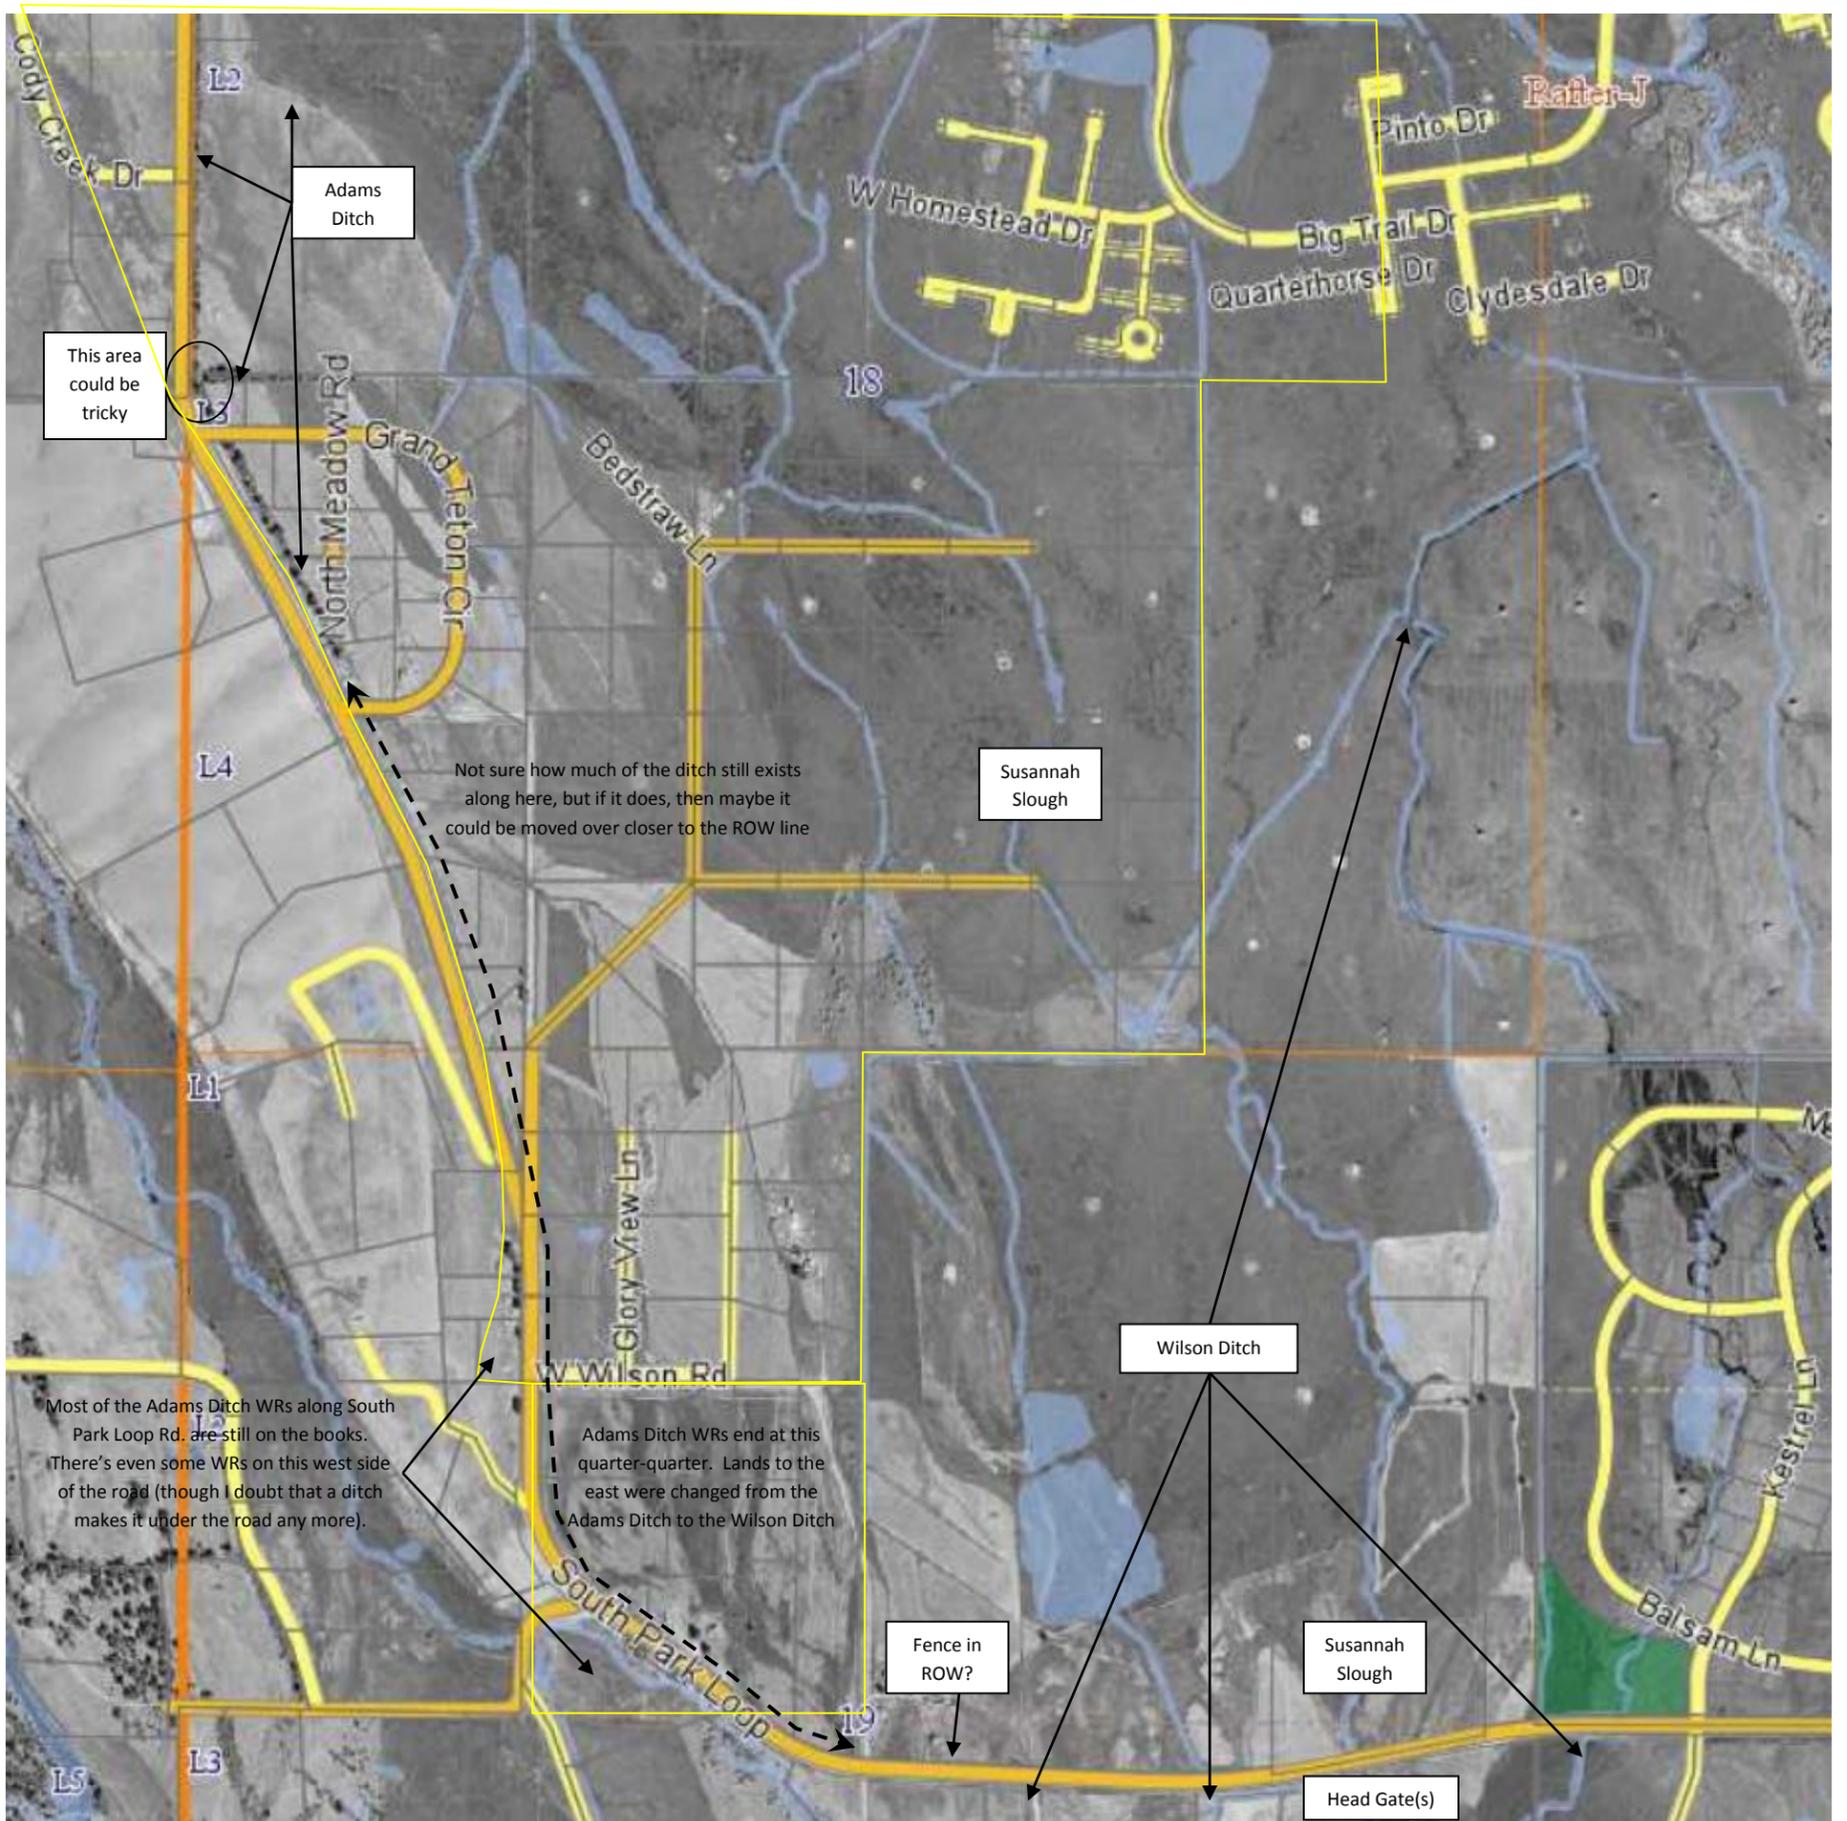

Hi Brain,

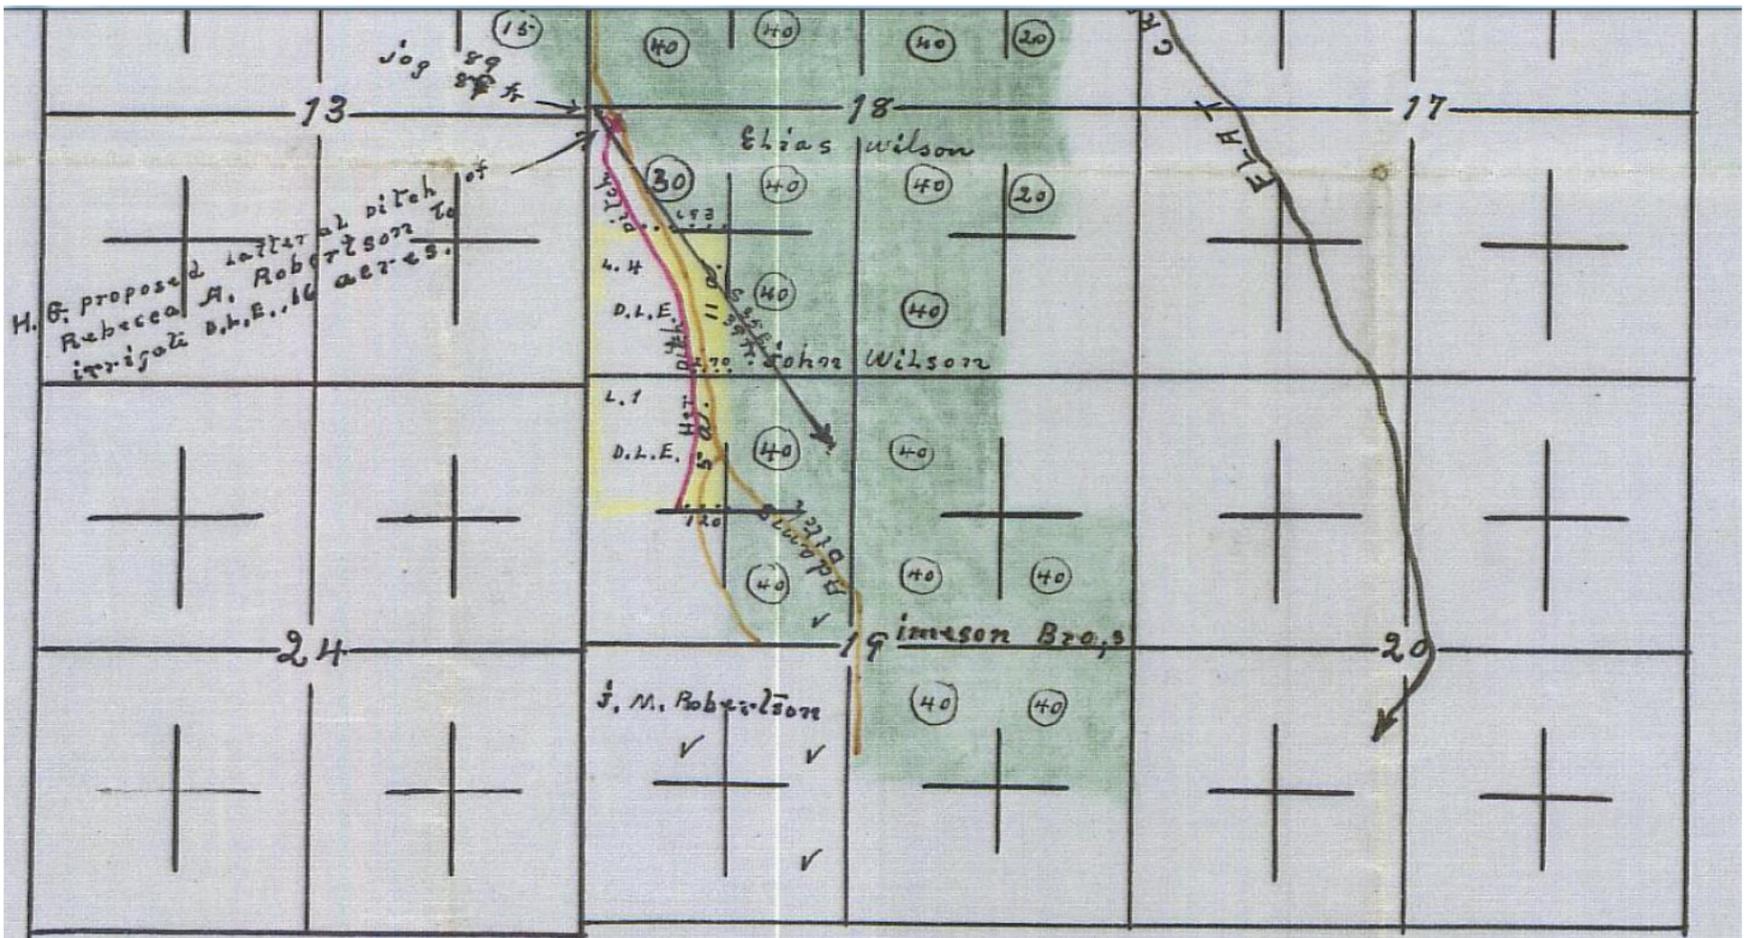

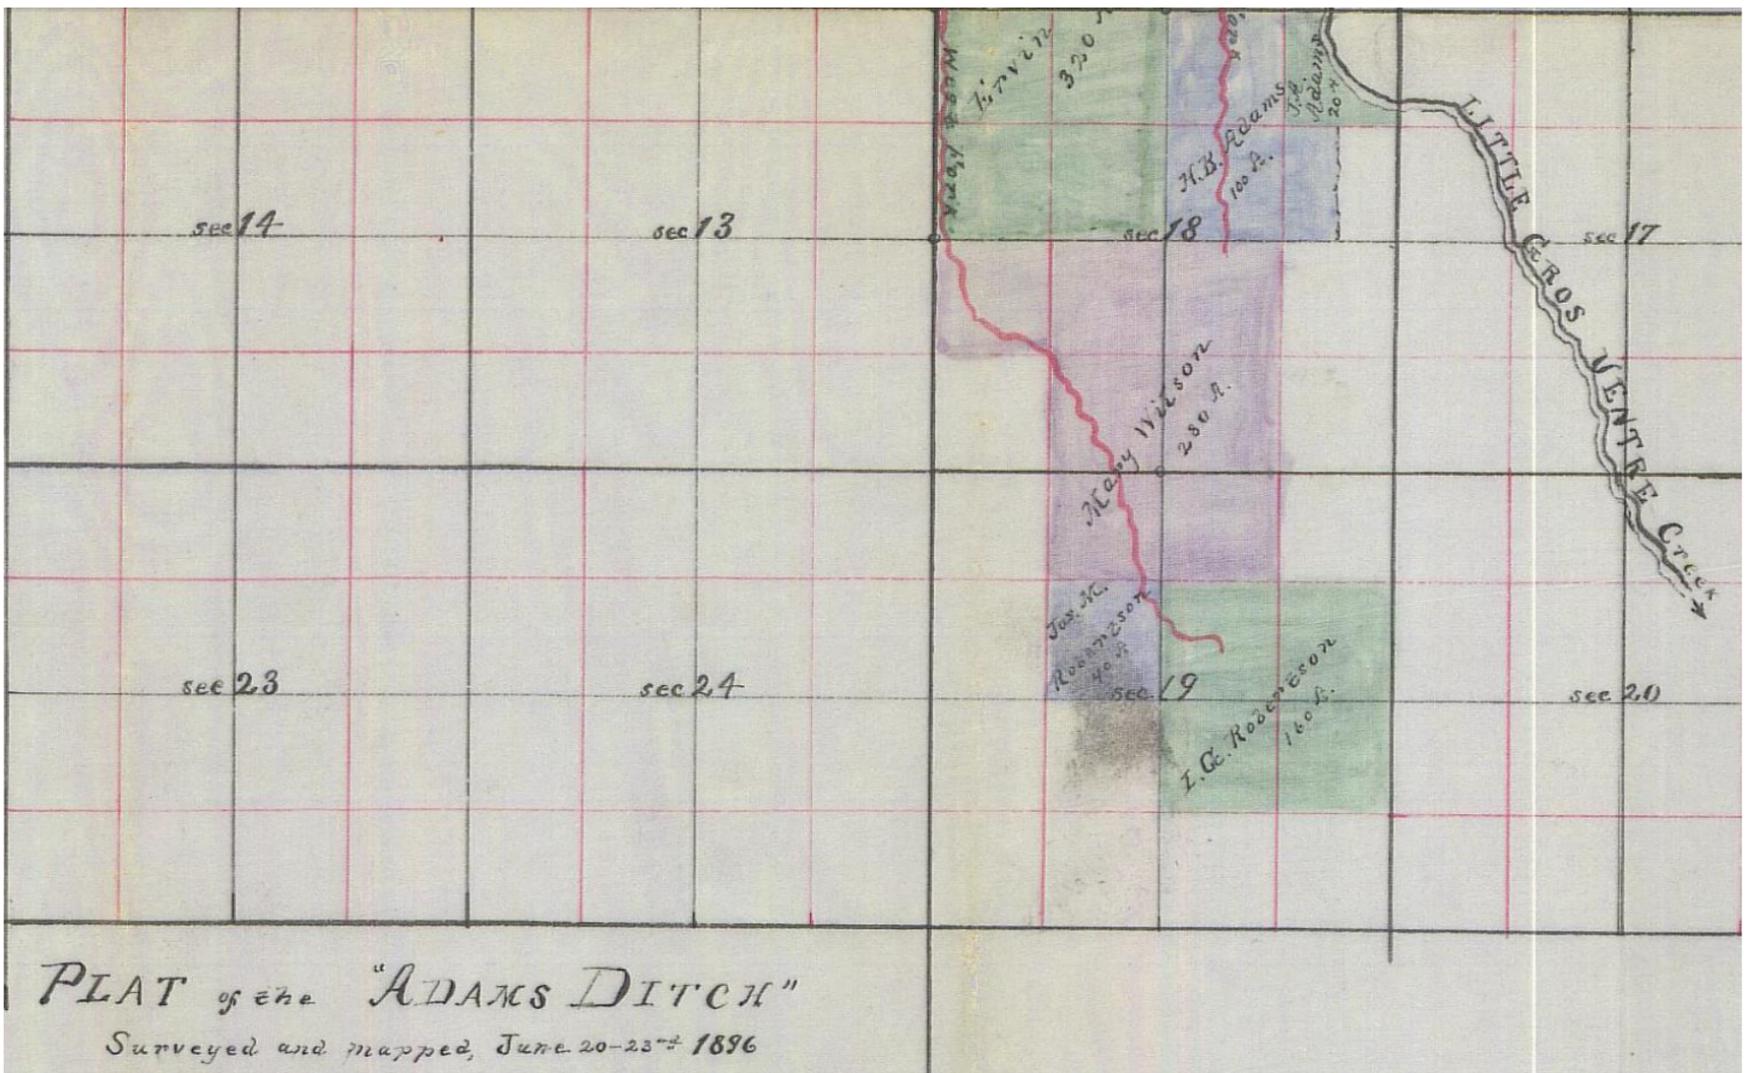

I looked for any irrigation plan plats for those subdivisions along South Park Loop Road. Most of them are too old and they don't show the ditches (the Buttercup Subd. showed the Adams Ditches and easements, but that's too far to the east). Most of those lots still have water rights out of the Adams Ditch or the Wilson Ditch, but I haven't been down there to see if the ditch still exists all along the county road. If it does and there isn't room for the bike path, then you might consider moving the ditch over. Keep in mind that the ditch may have a prescriptive easement where it is (see attachment, which is what I send to anyone asking me if they can move a ditch). Hopefully, you won't have to deal with that. There's a few places where it might be kind of tight or there's a fence in the ROW, but you're probably mostly going to be dealing with crossings for the Wilson Ditch and Susannah Slough. I'm also attaching some maps that I was looking at/ working on today. Not sure why people along the county road don't use their WRs (unless the ditch is gone), but since most of them still have them, you just want to play the CYA game. Let me know if you have any questions.

Bodie
