Appendix I
Traffic Plan
NOTES:

- The change of the alignments of the Teton Village Entrance Road and McCallister Drive from the alignments originally approved in the Resort Master Plan to where the roads are now located was made at the request of Teton Village Association, Inc., Teton Village, and Teton County. These alignment changes were not requested by the applicant. This plan shows the north-south segment of the Teton Village Entrance Road in its approved final alignment (except its current temporary alignment). The current alignment of McCallister Drive is not expected to change. However, the alignment of McCallister Drive runs through parcels in the Village Core significantly reducing the developable area as defined in the original Resort Master Plan. The re-location of development and corresponding modifications of dimensional limitations will be resolved during Sketch Plan processes for remaining areas of the Village Core.

- The one-lane local transit and call service road will have a 12 foot wide paved surface with a 30 foot by 10 foot wide pullout approximately midway between Bowman Road and Jensen Canyon Road and will serve as a local connector, an alternative emergency access, a pathway, and for call service.

- Down town Road is subject to relocation.

- Tram Line Road and Hartweg Road and their adjoining walkways may be relocated, modified, or reconfigured.

- The requirement and timing for the applicant to provide to Teton County an easement (up to 60 feet wide) for access from the Tram Line Road alignment east of Crystal Springs Road to the southwest corner of the exaction parcel will be determined at the discretion of the Board of County Commissioners upon the first of the following to occur: (1) the construction of Tram Line Road is required by the Master Plan; (2) a building permit is issued by Teton County for either Parcel K or Parcel N; or (3) a determination by the Board of County Commissioners that a connection is warranted by the development of a school, park, or fire house on the exaction parcel. Access may be in the form of an access road, driveway, and/or non-motorized pathway. The County Attorney shall review and approve the easement prior to recordings. The County shall be responsible for constructing any access improvements within the easement, although the applicant desires to construct portion of the access at the time of development of Parcel K or Parcel N, they may do so in coordination with Teton County.
