Appendix O
Storm Water Plan
NOTE: The change of the alignments of the Teton Village Entrance Road and McCallister Drive from the alignments originally approved in the Resort Master Plan to where the roads are now located was made at the request of Teton Village Association SSD, Teton Village, and Teton County. These alignment changes were not requested by the applicant. This plan shows the north-west segment of the Teton Village Entrance Road in its approved final alignment (versus its current temporary alignment). The current alignment of McCallister Drive is not expected to change. However, the alignment of McCallister Drive narrows through parcels in the Village Core significantly reducing the developable acreage as defined in the original Resort Master Plan. The re-location of development and corresponding modification of dimensional limitations will be resolved during Sketch Plan processes for remaining areas of the Village Core.
