

# District 10: South Park

## Complete Neighborhood + Rural Area Chart

DEFINITION		EXST.	FUTURE	
COMPLETE NEIGHBORHOOD	Defined Character/High Quality Design	○	○	
	Public Utilities	●	●	Sewer and some water
	Quality Public Space	◐	◐	Neighborhood parks, pathways
	Variety of Housing Types	○	○	
	Walkable Schools, Commercial + Recreation	○	◐	Potentially add a school and increase interconnectivity
	Connection by Complete Streets	○	○	
RURAL	Viable Wildlife Habitat + Connectivity	◐	◐	Protect Flat Creek and open space
	Natural Scenic Vistas	●	●	Preserve agricultural foreground gateway
	Agricultural + Undeveloped Open Space	●	●	Conserve agricultural open space
	Abundance of Landscape over Built Form	◐	●	Improve clustering
	Limited, Detached, Single Family Res. Development	●	●	Predominately detached single family
	Minimal Nonresidential Development	●	●	Maintain existing

Legend: ● Generally Present; ◐ Partially Present; ○ Generally absent

## Existing + Future Desired Characteristics

South Park is, and should continue to be, the agricultural southern gateway into Jackson. The existing agricultural open space that defines the character of the district provides a scenic foreground for Teton views, wildlife habitat connectivity, reference to our community's heritage and stewardship ethic, and a quiet rural setting for residents. The most important habitat in the district is the Flat Creek riparian corridor; however, the intensity of wildlife vehicle collisions on South Highway 89 shows the importance of the district's open space for wildlife movement in all directions. Existing development is predominately residential and largely occupied by the workforce. It is clustered to the southeastern portion of the district, with the densest areas well screened from the highway by topography, vegetation, and other development. The existing developments are well served individually by pathways, parks, and infrastructure, but lack interconnection and require highway travel to access convenience commercial and other amenities.

The district should maintain the character that it has today. Agriculture and other means of preserving open spaces should be encouraged, and development should be directed into a Complete Neighborhood wherever possible. Development that does occur should be clustered adjacent to existing development. Wildlife habitat connectivity and permeability should be enhanced through existing development and across Highway 89. The Flat Creek corridor should be preserved and enhanced with a focus on wildlife habitat and movement. Provision of START service and possibly a school will be encouraged to better serve the workforce living in and around this district. Future character should also include improved interconnectivity and internal connection to the commercial amenities along South Highway 89 via pathways and potentially via roadways. Roadway connections between existing neighborhoods should be based upon proposals from the affected neighborhoods.

## Policy Objectives

---

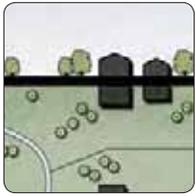

<i>Common Value 1: Ecosystem Stewardship</i>	1.1.c: Design for wildlife permeability
	1.2.a: Buffer water bodies, wetlands, and riparian areas from development
	1.3.b: Maintain expansive hillside and foreground vistas
	1.4.b: Conserve agricultural lands and agriculture
	1.4.c: Encourage rural development to include quality open space
<i>Common Value 2: Growth Management</i>	3.1.b: Direct development toward suitable Complete Neighborhoods subareas
	3.1.c: Maintain rural character outside of Complete Neighborhoods
<i>Common Value 3: Quality of Life</i>	5.3.b: Preserve existing workforce housing stock
	7.3.a: Develop a land use pattern based on transportation connectivity
	7.3.b: Reduce wildlife and natural and scenic resource transportation impacts

---

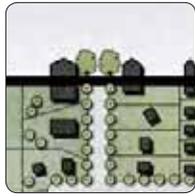

# Character Defining Features

## 10.1: Southern South Park

Conservation Form

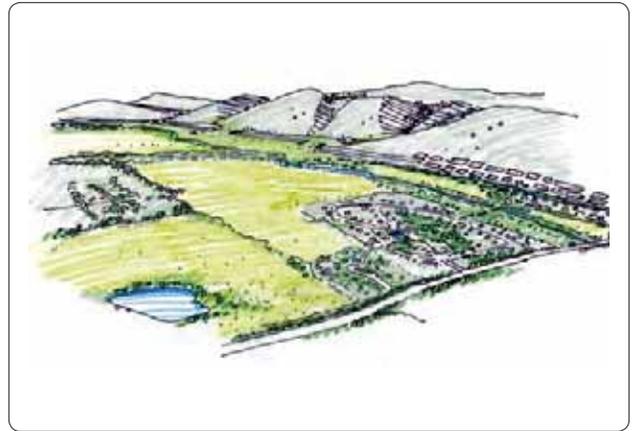

Residential Form

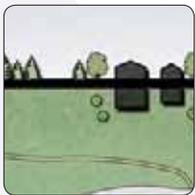

This CONSERVATION Subarea will continue to be defined by clustered housing including workforce housing that allows for wildlife movement. Preservation and enhancement of the wildlife habitat

along the Flat Creek corridor and through the existing developed areas is essential for wildlife movement; it is this wildlife use of the Flat Creek corridor that should continue to define its character. The open space interior to this subarea is a defining feature and should be preserved

to the extent possible while respecting private property rights through promotion of agricultural use, directing development potential into a Complete Neighborhood, or other methods. Any development of the existing open spaces should be clustered adjacent to existing development. The resident workforce character of this subarea should also be preserved to the extent possible. Redevelopment should be designed to enhance wildlife movement, whether or not efforts to reduce density without decreasing workforce housing opportunities are successful. In the future, residents should be able to travel via pathway and potential via roadway between existing subdivisions and access nonresidential amenities on the highway without using the highway or South Park Loop Road. Roadway connections between existing neighborhoods should be based upon proposals from the affected neighborhoods. In addition, this subarea should be regularly served by START. When the School District needs additional capacity, southern South Park is an appropriate place for a new school to serve the existing population that lives south of Town.

## 10.2: Central South Park

Agriculture Form

This PRESERVATION Subarea is defined by agricultural open space. The most important of these open spaces is the area between Flat Creek and the highway. This area not only provides the scenic gateway into Town, but also preserves an open area for a wildlife crossing of the highway that would allow for movement of wildlife throughout the district to crucial habitat nearby. Continued

agricultural use of the subarea will maintain the open space that defines the district and is the ideal use of the subarea. Agriculture will be encouraged through regulatory exemptions and allowances. Accessory uses that do not detract from the agricultural character of the subarea but facilitate the continued viability of agriculture may be appropriate. Development potential should be directed into Complete Neighborhoods wherever possible, while respecting private property rights. Development that does occur should be clustered near existing development and be designed to protect scenic vistas and agricultural viability, which also protects wildlife habitat and wildlife permeability. The scale of development should be of a rural character, consistent with the historic agricultural compounds and neighborhoods of the community.

## Why Illustrate Our Vision?

Realizing our Vision requires proactively planning for what we want - rural open spaces and high quality Complete Neighborhoods - by identifying where we want them and what we want them to look like. Our Vision is that development be designed to enhance our community character and located in suitable areas in order to preserve and protect the ecosystem and western, rural character. The Illustration of Our Vision defines the type of preservation or development in each area of the community that will allow us to realize our Vision. In areas suitable for development, the Illustration of Our Vision describes how we will protect the character we love while ensuring that development enhances our Quality of Life. In all other areas, the Illustration of Our Vision describes how we will preserve and enhance wildlife habitat, wildlife connectivity, scenic vistas, and open space.

Defining desired character for all areas of the community provides predictability in planning and development, which has been absent in the past. Incremental, site-specific determinations of policy applicability that are emotionally, politically

and legally tied to a specific development plan are no longer the community's growth management principle. The Illustration of Our Vision bridges the gap between our Vision and the development of an individual site so that all community members can understand how an individual preservation or development project should contribute to the achievement of our Vision. The Illustration of Our Vision will inform land development regulations that ensure no policy of this Plan is forgotten and that all policies are implemented within the proper context.

The Illustration of Our Vision also provides accountability and measurability. By defining the existing and desired character of each area of the community, we can quantify our progress toward achieving our Common Values of Community Character. With this information we can determine what policies and strategies are appropriate in which locations. The Illustration of Our Vision will enable the rigorous analysis needed to continually adapt our implementation strategies to ensure that preservation and development occur in the desired amount, location and type.

# How is the Vision Illustrated?

The Illustration of Our Vision depicts the policies of the community's three Common Values of Community Character through four levels of character classification.

At the highest level, the private lands of the community are divided into Character Districts – areas with common natural, visual, cultural and physical attributes, shared values and social interaction. Character District boundaries are based on a layering of the best available quantitative and qualitative data for each of the three Common Values of Community Character (Ecosystem Stewardship, Growth Management, Quality of Life) in order to identify areas that share similar characteristics (see Appendix B Framework Maps).

While our community's 15 Character Districts share Common Values, each has a unique identity, based upon the presence or absence of specific characteristics, each Character District is classified as either a Rural Area focused on ecosystem stewardship or a Complete Neighborhood focused on enhancing Quality of Life. The map on pages IV-4 and IV-5 shows the Character District boundaries, defines Complete Neighborhood and Rural Area characteristics and identifies the classification of each Character District.

At the next level, each Character District is divided into subareas. Each subarea is categorized as Stable, Transitional, Preservation or Conservation based upon the existing character of the subarea and the desired future character for the entire Character District. Stable and Transitional Subareas are the most suitable locations for people to live, work and play. Subareas focused on Ecosystem Stewardship are designated as Preservation or Conservation. The map on pages IV-6 and IV-7 shows the subareas and defines the subarea classifications.

Finally, for each subarea, Character Defining Features are described to ensure the desired character is illustrated. The Character Defining Features provide the greatest level of site specific detail; however the characteristics are still conceptual and will inform specific regulations, incentives and programs. The characteristics valued by the community within a subarea are mapped, described and illustrated. On pages IV-8 and IV-9 is a legend that describes the symbols and graphics used on the Character Defining Features Maps. An appropriate Neighborhood Form(s) is also identified for each subarea. A Neighborhood Form identifies the general pattern and intensity of development that meets the desired character. On pages IV-10 and IV-11 is a transect that depicts the continuum of Neighborhood Forms that make up our community and shows the relationship between the various patterns and intensities.

# Stable, Transitional, Preservation, + Conservation Subareas

## Stable Subarea

- Subareas in which no change to the existing character is necessary
- Development will be infill that maintains the existing identity or vitality
- The subarea may benefit from strategic infill or development of non-existing Complete Neighborhood amenities

## Transitional Subarea

- Subareas where most of the community would agree that development/ redevelopment or a change in character would be beneficial
- Subareas that would benefit from reinvestment and revitalization
- Goals for development include improving access to jobs, housing and services and reducing reliance on single-occupancy trips

## Preservation Subarea

- Subareas in which no change to the existing undeveloped character of the scenic resources and wildlife habitat is necessary
- Additional amenities and infrastructure are inappropriate
- May benefit from some clustered residential development that improves the overall preservation of open space

## Conservation Subarea

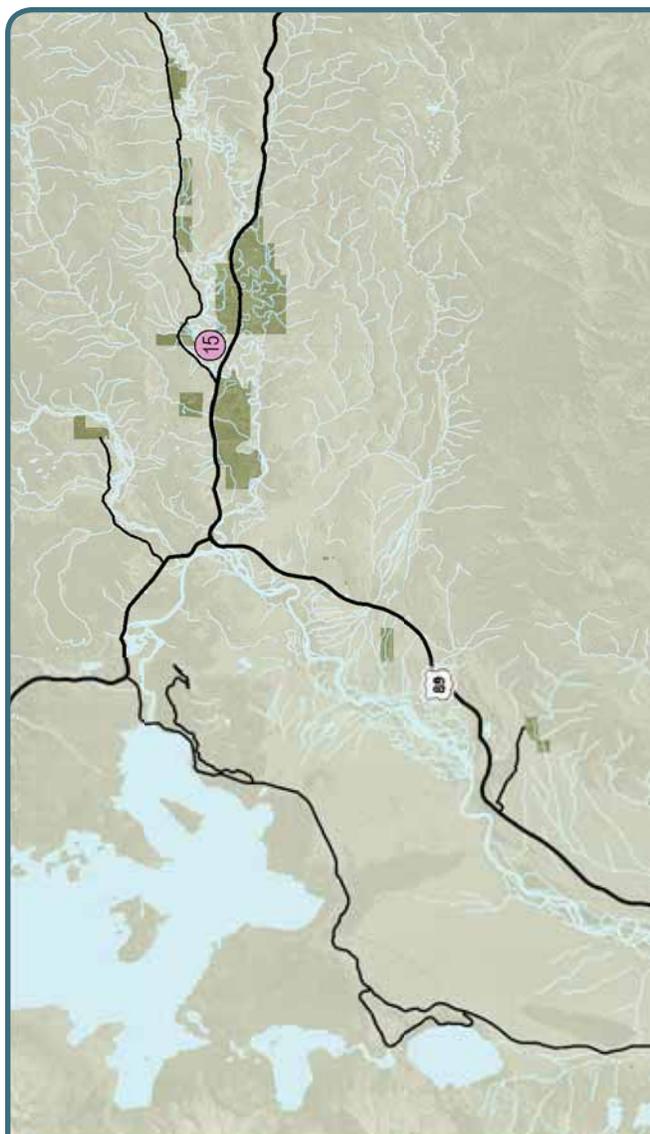

- Areas of existing development and platted neighborhoods with high wildlife values, where development/ redevelopment should focus on improved conservation
- Areas that benefit from an increase in open space, scenic resources, and habitat enhancement
- Goals include balancing existing development with improved wildlife permeability and scenic enhancements.

# Character Defining Features - Map Symbols

The Character Defining Features Maps depict the characteristics that define each district and subarea. Below is a list of symbols and map attributes that are used on the maps. Characteristics that are locational are shown on the map using colored symbols or map attributes. Other characteristics depicted using black symbols, apply generally to a subarea, but are not location specific. All mapped features are illustrative of the character of an area and do not imply desired regulatory boundaries or specific locations for certain attributes.

## *Common Value 1 – Ecosystem Stewardship*

**Wildlife Permeability:** Design for wildlife permeability should be a characteristic of the subarea.

**Agriculture:** Agricultural use should be characteristic of the subarea.

**Wildlife Highway Crossing:** Wildlife-vehicle collision mitigation emphasis site as identified by the Western Transportation Institute and Montana State University College of Engineering in 2012.

**Crucial Habitat:** Bald eagle, trumpeter swan, mule deer, elk, and/or moose crucial winter habitat; mule deer and/or elk migration corridor; and/or bald eagle and trumpeter swan nesting area; and/or cutthroat trout spawning area as identified by the Conservation Research Center of Teton Science Schools in 2008.

**Scenic Corridor/Vista:** Scenic highway corridors and vistas as identified on 1994 Community Issues Maps.

## *Common Value 2 – Growth Management*

**Gateway:** A gateway into the community.

**Public Parking:** Existing parking provided by the Town of Jackson.

**Road Corridor Enhancement:** A roadway corridor that will be characterized in the future by enhanced pedestrian and commercial vitality.

**Creek Corridor Enhancement:** A creek within a Complete Neighborhood that will be characterized in the future by enhanced recreational opportunities and ecological value.

---

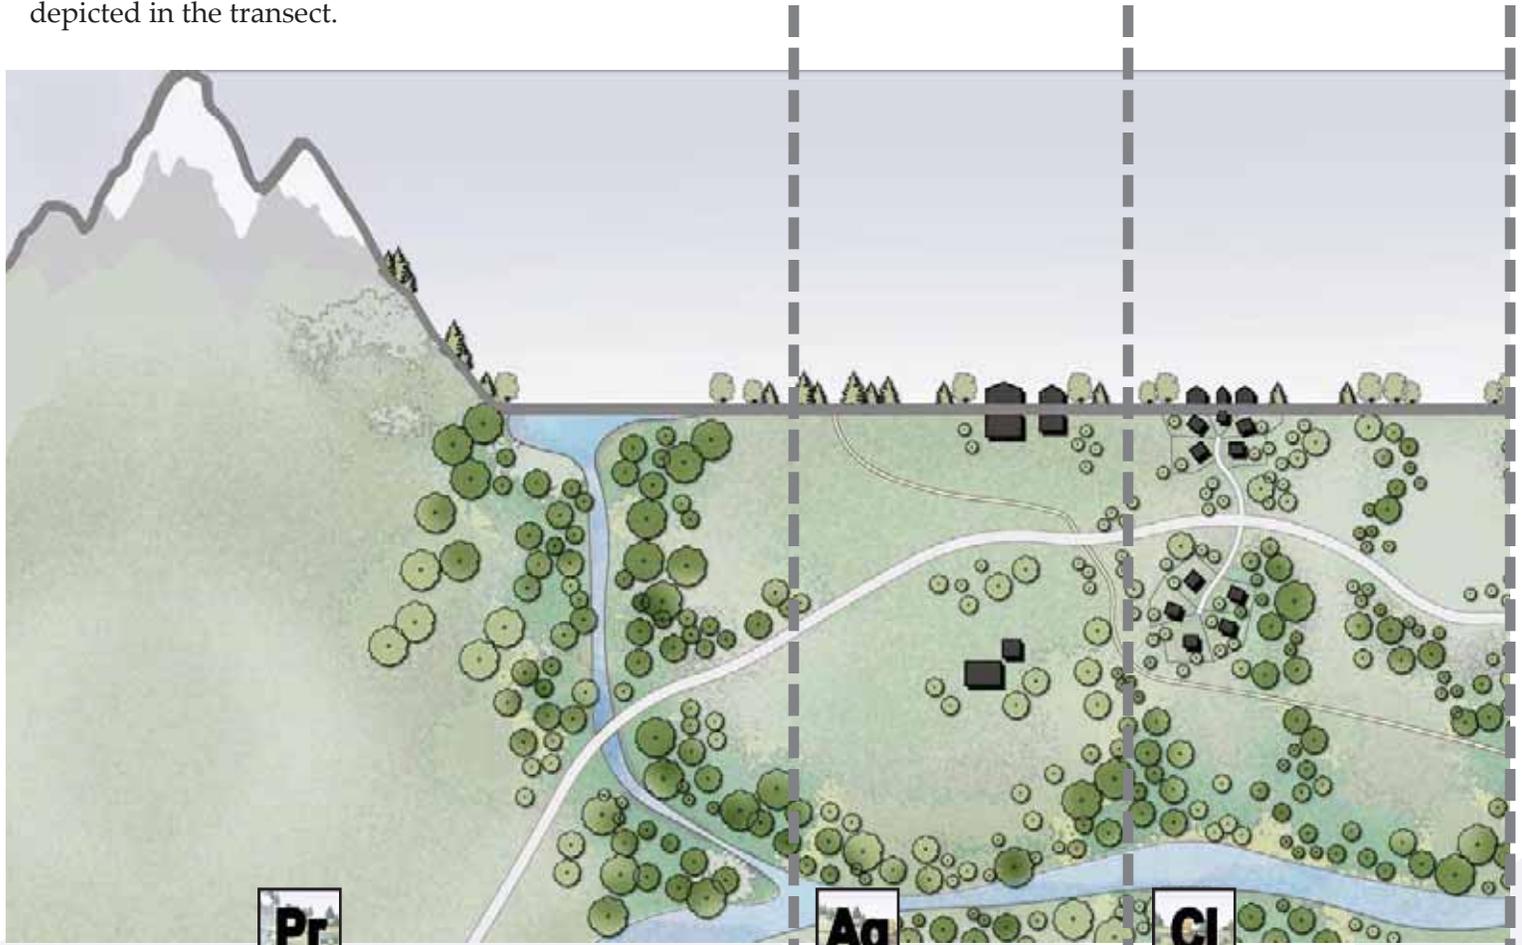

### *Common Value 3 – Quality of Life*

-  Workforce Housing: Housing occupied by the workforce should be a characteristic of the subarea.
-  START Service: START service should be a characteristic of the subarea.
-  Local Convenience Commercial: Local convenience commercial should be located within the subarea.
-  Industrial: Light industrial and heavy retail use should occur in the subarea.
-  Parks and Recreation: Existing parks and recreation facilities.
-  School: Existing schools.
-  Key Transportation Network Project: Transportation network projects identified in Policy 7.2.d.
-  Existing/Proposed Pathways: Existing and proposed pathways identified in the Pathways Master Plan (2007).
-  Improved Interconnectivity: An area that will be characterized in the future by increased interconnectivity.

# Character Defining Features - Neighborhood Form Continuum

A Neighborhood Form identifies the general pattern and intensity of development representative of a certain character. One or more Neighborhood Forms are associated with each subarea. Below is a transect that depicts the continuum of Neighborhood Forms that make up our community and shows the relationship between the various patterns and intensities that define our character. The table below the transect describes characteristic acreages, heights, uses, and special considerations for each Neighborhood Form. These general characteristics are not prescriptive and are only meant to help describe the general pattern and intensity depicted in the transect.

# What Does the Illustration of the Vision Address?

Our community's Vision is illustrated in 15 Character Districts. Each Character District has unique issues, opportunities and objectives. Each Character District contributes to the overall implementation of the Comprehensive Plan and will ensure that preservation and development occur in the desired amount, location and type throughout the community.

Each Character District is composed of 6 parts:

1. The Vicinity Map identifies the district boundaries and the size of the district in relation to the entire community. It also depicts the boundaries of the district subareas and their Stable, Transitional, Preservation, or Conservation classification.

2. The Character Defining Features Map depicts the characteristics that define each district and subarea. Characteristics are described through mapping or shown symbolically. Mapped features are illustrative of the character of an area and do not imply desired regulatory boundaries or specific locations of attributes. A complete list of symbols used on the maps can be found on pages IV-8 and IV-9.

3. The Complete Neighborhood/Rural Area Table indicates whether the district currently has the characteristics of a Complete Neighborhood or a Rural Area. It also indicates whether those characteristics will be maintained or enhanced in the future. This table serves to explain the classification of the district and identify the district's broad focus, basic issues, and opportunities.

3

### Complete Neighborhood + Rural Area Chart

	DEFINITION	EXISTING	FUTURE	
COMPLETE NEIGHBORHOOD	Distinct Character/High Quality Design	●	●	1-3 story, western character, elegant pedestrian use, street wall
	Public Utilities	●	●	Water, sewer, storm sewer
	Quality Public Space	●	●	George Washington Memorial Park
	Variety of Housing Types	●	●	Condominiums, lofts, apartments
	Walkable Schools, Commercial + Recreation	●	●	Post Office, START, Limited commercial, schools, parks
	Connection by Complete Streets	●	●	Alternative transportation a priority
RURAL	Viable Wildlife Habitat + Connectivity	○	○	
	Natural Scenic Views	○	○	
	Agricultural + Underdeveloped Open Space	○	○	
	Abundance of Landscape over Built Form	○	○	
	Limited, Detached, Single Family Res. Development	○	○	
	Minimal Nonresidential Development	○	○	

Legend: ● Generally Present, ● Partially Present, ○ Generally Absent

IV-14

4. Existing + Future Characteristics describe in words the existing and future character of the district, focusing on the elements of character that should be preserved or enhanced. This section provides the overall goals and vision for the district.

4

#### Existing + Future Desired Characteristics

The Town Square District is the historic center of Jackson Hole and the central gathering space for residents and visitors alike. The district is home to iconic buildings and public spaces, including the Cowboy Bar, George Washington Memorial Park (the "Town Square"), and the sawtooth building profiles surrounding the Town Square. Preserving the existing western character and heritage found in the buildings and public spaces in this district will be key to maintaining the existing character. The district is the center of the visitor experience in Town and plays an important role in defining our community's western heritage and overall community identity.

A future goal of the district is to have visitors and residents visit the area more often and stay longer, increasing the vitality of the area and supporting the local economy. To support this goal, commercial uses that create an active and engaging pedestrian experience, will be located on the first and second floors of buildings. Examples of these uses include restaurants, bars, a variety of retail shops and commercial amusement. In the future, the district will be the center of a Downtown Retail Shopping District, and office, residential and lodging uses will be predominantly located on upper floors.

Future community reinvestment in the district will create great public spaces and amenities for residents and visitors alike. This investment will not only create a positive visitor experience that supports our local economy, but will also continue the tradition of the Town Square as the gathering place for our community. The district will continue to be the center of community life, hosting a variety of events and community celebrations for residents and visitors. The temporary closure of streets, parking lots, parks and other public spaces will be encouraged to support such events. In addition, the community should consider the temporary and permanent closure of some streets to vehicles in order to create a vibrant pedestrian environment. *forward, the community will take great care and consideration in all future planning and redevelopment.*

5. The Policy Objectives are policies from the Common Values of Community Character chapters of the Comprehensive Plan that are particularly relevant and should be implemented in the district. There may be other policies that apply to the district, but these are the key objectives to be met in the district in order for the community to achieve our Vision.

5

#### Policy Objectives

<i>Common Value 1: Ecosystem Stewardship</i>	N/A
<i>Common Value 2: Growth Management</i>	4.1.d: Maintain Jackson as the economic center of the region 4.2.c: Create vibrant walkable mixed-use subareas 4.2.d: Create a Downtown Retail Shopping District 4.2.e: Protect the image and function of Town Square 4.2.f: Maintain lodging as a key component in the downtown 4.4.a: Maintain and improve public spaces 4.4.c: Continue traditions and community events 4.5.a: Identify and preserve historically significant structures and sites
<i>Common Value 3: Quality of Life</i>	6.2.a: Enhance tourism as the basis of the economy 6.3.a: Ensure year-round economic viability 7.1.c: Increase the capacity for use of alternative transportation modes

6. The Character Defining Features describe each subarea through text, Neighborhood Forms, and photos and/or drawings. The focus of the description is the character priorities that will allow for the desired character of the district, and consequently the community Vision, to be achieved. The Neighborhood Form(s) depict the general pattern and intensity of development that meets the desired character; while the illustrations and/or photos provide a more detailed illustration of the desired built form. The entire continuum of Neighborhood Forms can be found on pages IV-8 and IV-9.

6

#### Character Defining Features

##### 1.1: Inner Square

Inner Square

This STABLE Subarea will focus on maintaining western character by retaining or replicating the existing built environment. Building heights directly fronting the Town Square should not exceed two stories. Buildings should be located near the street to create an attractive street front. A desired western architectural style and approach will be defined. The continuation of covered wooden boardwalks is vital to maintaining the desired western character. Parking will be provided predominantly in public lots, underground, and on street to create a vibrant, walkable area oriented to pedestrian.
