## Escape Plan

Know ahead of time how you will get out if you have a fire. Develop an escape plan which includes having an alternate exit out of every room. Make sure you can open and get out of windows and doors. All post- HUD Standard manufactured homes are required to provide windows designed for use as secondary escape routes for the bedroom. Familiarize yourself with their operation and don't block access to them. Immediately fix any windows that have been painted or nailed shut, door that are stubborn or "stuck" and locks that are difficult to operate. Security bars or grates over windows or doors should have quick release devices installed inside, which allow you to open them in an emergency. Hold a fire drill twice a year to rehearse how you will react if the smoke alarm sounds.

Know at least two ways out of every room, if possible.

Have an outside meeting place a safe distance from the home where everyone should meet.

Practice using different ways out.

Teach children how to escape on their own in case you can't help them.

If the smoke alarm sounds Get Out AND STAY OUT.
