Contact Information:

Name: NANCY & DAN CLANCY email: CLANCY.WY@GMAIL.COM

What considerations are most important to you for this project?

- Safety
- Cost of construction
- Aesthetics
- Maximizing usability
- Minimizing environmental impacts
- Maintaining existing corridor character
- Project schedule

Additional comments on the project considerations. (e.g. Why are these important to you? Should anything be added?)

MAINTAINING OR IMPROVING CORRIDOR CHARACTER

After hearing some of the pros and cons of each alignment alternative, which of the following best describes your thoughts on the alternatives?

- a. The pathway should stay on one side of the road (the south/west side), even if it requires retaining walls or other structures.
- b. It's okay if the alignment requires path users to cross the road twice.
- c. No strong preference on alignment.

Any additional comments?

SOUTH PARK RANCH ROAD IS A GOOD PLACE FOR CROSSING

The most important consideration is having a  
safe pathway as soon as we can

What considerations are most important to you for this project?

- Safety
- Cost of construction
- Aesthetics
- Maximizing usability
- Minimizing environmental impacts
- Maintaining existing corridor character
- ~~xxx~~  Project schedule

Additional comments on the project considerations. (e.g. Why are these important to you? Should anything be added?)

We really need to get this built before  
someone, especially a child, is hurt/killed.

After hearing some of the pros and cons of each alignment alternative, which of the following best describes your thoughts on the alternatives?

- a. The pathway should stay on one side of the road (the south/west side), even if it requires retaining walls or other structures.
- b. It's okay if the alignment requires path users to cross the road twice.
- c. No strong preference on alignment.

Any additional comments?

I came in feeling strongly about staying  
on the South side - now I'm undecided.....

What considerations are most important to you for this project?

- Safety
- Cost of construction
- Aesthetics
- Maximizing usability
- Minimizing environmental impacts
- Maintaining existing corridor character
- Project schedule

Additional comments on the project considerations. (e.g. Why are these important to you? Should anything be added?)

- The future density of South Park, future traffic concerns if/when Tribal Trails is completed  
- The look of neon crossing signage and markings/safe zones - yuck

After hearing some of the pros and cons of each alignment alternative, which of the following best describes your thoughts on the alternatives?

- a. The pathway should stay on one side of the road (the south/west side), even if it requires retaining walls or other structures.
- b. It's okay if the alignment requires path users to cross the road twice.
- c. No strong preference on alignment.

Any additional comments?

Although I was a full-on South/West advocate, I do see the positives of the option D, North/East. Safety is #1, ~~the~~ ~~the~~ aesthetics of crossings + additional concrete safety zones a big concern.

X-ing @ SPRanch Rd. & Munger View Park

**After hearing some of the pros and cons of each alignment alternative, which of the following best describes your thoughts on the alternatives?**

- a. The pathway should stay on one side of the road (the south/west side), even if it requires retaining walls or other structures.
- b. It's okay if the alignment requires path users to cross the road twice.
- c. No strong preference on alignment.

**Any additional comments?**

If crossing are in high visibility areas, well-marked, reduced speed if necessary

Additional comments on the project considerations. (e.g. Why are these important to you? Should anything be added?)

I would like to see crossing have the stripes, signs and rumble strips. →

After hearing some of the pros and cons of each alignment alternative, which of the following best describes your thoughts on the alternatives?

- a. The pathway should stay on one side of the road (the south/west side), even if it requires retaining walls or other structures.
- b. It's okay if the alignment requires path users to cross the road twice.
- c. No strong preference on alignment.

Any additional comments?

across from Grand Teton Circle  
With the hillside already being so unstable, I would not want to mess with it. Perhaps putting a return wall between the road and bike path → and drainage

on the Grand Teton Circle side of the road  
would also help if/when that hill slides.

rumble  
strip

sign

• Sign

~~rumble~~ rumble strip  
far enough  
ahead for  
speeding traffic  
to stop.
